XAVIER TABLES

SOC ANALYST I | JUNIOR SECURITY ANALYST | SECURITY OPERATIONS

Cleveland, Ohio | LinkedIn / Contact | GitHub Portfolio

PROFILE

Security+ certified candidate with completed Tri-C SecurePath training and college programming coursework. Investigated authentication anomalies in Splunk, reviewed Windows security events, and documented a guided Nessus scan. Published case reports link findings to executed queries and screenshots.

SELECTED LAB PROJECTS

Splunk: Windows Account Activity and VPN Sign-ins | TryHackMe datasets

- Ran 11 SPL searches over 12,256 Windows events and 2,000 VPN events, examining logons, account changes, and Sysmon process ancestry.
- Identified two rare-country VPN events and four rapid transitions (15-57 minutes); considered routing and geolocation explanations.
- Published an evidence-linked case brief, search log, and sample handoff. Documented pending Windows host/session validation and recommended device/MFA checks.

Windows Security Log Triage | uCertify Windows lab

- Compared Event IDs 4724, 4738, 4624, and 4672; distinguished an Administrator password-change sequence from later SYSTEM service activity.
- Captured event and EVTX-export screenshots; identified reset authorization as an unanswered question.

Nessus: Guided Vulnerability Baseline | uCertify lab

- Configured and completed a 23-minute Basic Network Scan of one assigned host; the scanner displayed Auth: Pass.
- Recorded severity totals including 60 Critical and 98 High results. Documented individual finding validation and rescan steps as follow-up work.

TOOLS AND FOUNDATIONAL SKILLS

SIEM and logs: Splunk, SPL, Windows Event Viewer, Windows Security events, Sysmon, VPN authentication logs

Investigation practice: Authentication review, process ancestry, baselining, case briefs, and sample escalation handoffs

Systems and network training: Nessus, Wireshark, Nmap, Windows 10/11, Linux CLI, Active Directory, TCP/IP, DNS, DHCP

CERTIFICATION AND EDUCATION

CompTIA Security+ | Certified 2026

Tri-C SecurePath Cybersecurity Professional Training Certificate
Cuyahoga Community College | 14-week program completed June 2026

Associate of Arts | Cuyahoga Community College | 2022
Additional college programming coursework
